Art Unit: 3634

1. Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

This claim is replete with idiomatic/grammatical errors for which its intended meaning is not understood. For example: line 2, "in an integrated manner", line 7 "interdental spaces corresponding to each other vertically", lines 8-9 "the corresponding holding troughs" for which there is no antecedent basis, line 10 "two opposing holding troughs jointly holding", line 10 "a axle", line 11 "the pulley" for which there is no antecedent basis.

This claim is narrative in form and replete with functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Liu.

Liu discloses a pulley anchor dock 10 having a plurality of holding troughs 171 for housing sheaves 20.
